Beach Closings- Connect with us to get the latest updates
Reminder to sign up for E-notifications!

Eau Claire, WI, May 22nd, 2017 – Get ready for summer! Be sure you know where to find up-to-date beach closing information before the season officially kicks off. E-notifications are one of the ways you can get easy, fast, and reliable updates to keep you and your family safe throughout the summer.

This week the Environmental Health Lab began checking the level of bacteria in area beaches. *Beaches include: Riverview Park, Big Falls, Half Moon Lake, Lake Altoona, Lake Eau Claire and Coon Fork Beach and Campground.* In 2016, there were 9 beach closings in Eau Claire County. Although closings may change your beach day plans, they are for the safety of all beachgoers. High levels of bacteria in the water can make you and your family sick.

The Environmental Health Lab is also checking for harmful algae blooms in lakes and rivers. Algae blooms can be a variety of colors like blue, green, white, red or brown. Often times it looks like thick green paint floating on the water and can also give off a bad smell. Algae blooms will typically appear between July and September, especially with hot temperatures and a lot of rain. Harmful algae blooms can be toxic, especially to children and pets. Contact with algae can cause skin rash and/or ear, nose and throat irritation. Swallowing small amounts of algae can cause headache, nausea, vomiting and diarrhea. **If you see an algae bloom, stay out of the water and contact the Health Department at 715-839-4718.** Beaches will have signs displayed if water is potentially unsafe because of an algae bloom (see green sign to the right).

For the latest beach safety news and tips:

- [Sign up for e-notifications by visiting the City of Eau Claire’s website and clicking on sign up for e-notifications—select beach closings.](#)
- Like the Eau Claire City-County Health Department on Facebook
- Follow us on twitter @ehealthdept
