

MEMORANDUM

ENGINEERING DEPARTMENT

TO: Petition Form Recipient

FROM: City Engineer

SUBJECT: Street Improvement Petition

Attached is the form to petition for improvements to your street. A Street Improvement Petition form signed by adjacent property owners is one of the tools used to prioritize the City's proposed construction program. Completed petitions should be returned to the City Clerk's office.

When a petition is received, it is placed on the City Council Agenda with a resolution directing the City Engineer to prepare a report that identifies proposed improvements, an estimate of the total project cost, and an estimate of special assessments to each parcel. The report is completed and a Public Hearing is held during the winter following the receipt of the petition.

The proposed project may include items not included in the petition. For example, the petition may be to repave a specific street; however, replacement of the sewer may be included in the proposed project if the condition of the sewer main indicates that it should be replaced. Sidewalk may also be included in the proposed project even if it is not included in the petition. The City Ordinances provide direction for where sidewalks shall be constructed. The City Ordinances also provide provisions to defer sidewalk construction in some locations. The City Council retains the authority to review any sidewalk proposal and defer construction whenever it is deemed necessary and desirable.

Petitions must be received by October 1st of the current year to be included in the Report of the City Engineer for the following year.

Please contact the Engineering Department at 715-839-4934 with any questions.
